COLOR WHEEL TOOL INSTRUCTIONS

Color in your color wheel so that the tints are on the outer twelve-sided area, pure color in on the middle area, shades of the colors on the inner area (the very center has no color). Cut out the square, glue it down onto a sheet of tag-board/poster board and cut out around the square again. Using a brad (clip) to hold your two pages together, assemble the pages with your clear sheet on top. Glue your color wheel tool into the inside front cover of your Visual Art Journal.
